Forecast for Thursday 28 Apr 2022

Weather: A chilly perhaps frosty start. Any early valley mist or patches of cloud on lower slopes soon clearing to leave a dry and bright morning with some long sunny intervals, particularly in the west of the park. Fair weather cloud will build from mid-morning, with cloud becoming broken during the afternoon; remaining dry and with cloud bases staying clear of the summits.

Chance of cloud-free hill tops above 800m: 100%.

Low Cloud and visibility: Early valley mist may give briefly locally poor visibility around dawn, visibility very good otherwise. Cloud bases should remain clear of summits throughout.

Meteorologist's View

Layers are recommended as despite the light winds, it will still feel close to or below freezing on the higher peaks today. UV levels may be strong in any sunshine on western or higher routes - sun protection is advised.

Forecast for Friday 29 Apr 2022

Weather: Another widely chilly start to the morning, with some patches of valley mist or shallow fog. This soon clearing to leave a fine and dry day with long sunny spells with scattered amounts of fair weather cloud developing.

Maximum wind: Northeasterly or easterly 15mph.

Chance of cloud-free hill tops above 800m: 100%.

Low Cloud and visibility: Early valley mist and shallow fog may give locally poor visibilities around dawn. Cloud bases should remain clear of summits with excellent visibility expected at all levels.

Temperature: **Valleys:** Plus 1 Celsius becoming plus 14 Celsius by mid-afternoon.
At 800m: Plus 2 Celsius increasing plus 6 Celsius by mid-afternoon.
Freezing level: 800m at first rising slowly through the day. Frost at dawn in some valleys.
